## Disclaimer and Risk Warnings

Trading any financial market involves risk. The content of this e-book, its various associated websites and all related correspondence are neither a solicitation nor an offer to purchase or sell any financial instrument.

Although every attempt has been made to assure accuracy, we do not give any express or implied warranty as to its accuracy. We do not accept any liability for error or omission. Examples are provided for illustrative and educational purposes only and should not be construed as investment advice or strategy.

No representation is being made that any account or trader will or is likely to achieve profits or losses similar to those discussed in this e-book. Past performance is not indicative of future results. By purchasing the software, subscribing to our mailing list or using the website you will be deemed to have accepted these terms in full.

The LeapFX Team, their representatives and associates do not and cannot give investment advice. We endeavor to ensure that related websites are available 24 hours per day but we cannot be held liable if, for any reason, a site is unavailable.

The information provided in this e-book is not intended for distribution to, or for use by, any person or entity in any jurisdiction or country where such distribution or use would be contrary to law or regulation or which would subject us to any registration requirement within such jurisdiction or country. There are numerous factors related to the market in general and to the implementation of any specific trading program, which cannot be fully accounted for in the future of performance results, all of which can adversely affect actual trading results.

We reserve the right to change these terms and conditions without notice. You can check for updates to this disclaimer at any time without notification.

The content of this e-book and all related websites and correspondence are copyright and may not be copied or reproduced.

Commodity Futures Trading Commission Futures and Options trading has large potential rewards, but also large potential risk. You must be aware of the risks and be willing to accept them in order to invest in the FOREX, futures and options markets. The past performance of any trading system or methodology is not necessarily indicative of future results.

## Recommendations To Help You Excel

The following recommendations are to help you get the best and most profitable experience from your use of this software and trading Forex in general.

Please consider following these recommendations as we have reviewed them and utilized them for years successfully – including hundreds of other traders we work with.

### Which Forex Broker Should You Use?

While you can use any Forex broker you prefer that offers Meta Trader 4 platform. For best results we highly recommend using the following broker that works well with automated trading systems, promptly handles withdrawals, and offers good support.

**It is Blaze Markets you can find them here (open PRO account):** <https://www.blazemarkets.com>

Blaze Markets is a broker created by traders that got tired of dealing with poorly run brokerages. They wanted to create one that supports robot trading with optimal conditions. There are very fast execution speeds and competitive pricing.

After signing up download and install Meta Trader 4, which is provided free by them. (Please choose 200 leverage).

### Account Type to Use

Pro account type is preferred which offers lower spreads. Minimum recommended deposit is \$1,000, but we prefer \$5,000 to \$10,000 minimum to maintain safer risk with margin.

Because you can use many pairs with Trade Explorer, you will need to either have enough funds in the account, OR you will need to use less pairs.

If you want to use all pairs then we recommend \$5,000 minimum deposit. For safer trading use less pairs.

## **Use A VPS And Everything Will Run Even If Your Computer Is Off...**

You can avoid leaving your computer on and access your platform from any mobile device using a virtual server. We highly recommend using a VPS always for trading.

Click the link below to get your own VPS. It will be a windows VPS. The lower price plan is fine. It works like a computer, and they provide instructions on how to connect to it. Once in it you'll be able to use it like a normal computer. (You can use this with your Mac).

[Click Here for VPS Recommendations](#)

## **Want Someone to Install And Setup Trade Explorer For You?**

Don't feel like setting up the software or prefer someone else to do it for you? Not a problem, click the link below and have a pro do it for you.

[Click Here to Have a Pro Install Trade Explorer for You - https://www.fxinstall.com](https://www.fxinstall.com)

## **Is Your Trade Explorer License Activated?**

If you haven't already, please go back to member's area and scroll down to the section where you must activate Trade Explorer with your broker MT4 account number.

This is necessary to allow the software to run on your account. It can be changed anytime if you choose to switch accounts or brokers.

[Click Here To Go To Members Area](#)

## Account Trading Risk

For most accounts the default risk is good, and you'll just have to decide how many pairs to use based on your account size. If you want to use all pairs provided, then fund the account with \$5k to \$10k at least. Or if you don't mind higher risk you can use all pairs with any account size.

For more conservative, if using less than \$5,000, consider using 10 or less pairs.

We recommend using .01 lot size per \$10,000 (less returns, less risk) or .01 lot size per \$5,000 (more risk, more returns). Anything less than \$5,000 use .01 lot size. If you want higher risk you can increase the lot sizes further.

Lot size is a betting size per trade. If you are new you don't have to understand it simply use the numbers provided. If you are using for example \$10,000 (\$5,000 x 2), then you do  $.01 \times 2 = .02$  and set Lot Size = .02. You are of course welcome to use higher risk at your discretion if you want to get larger returns. Note can be more dangerous at times, but greater profit when increased.

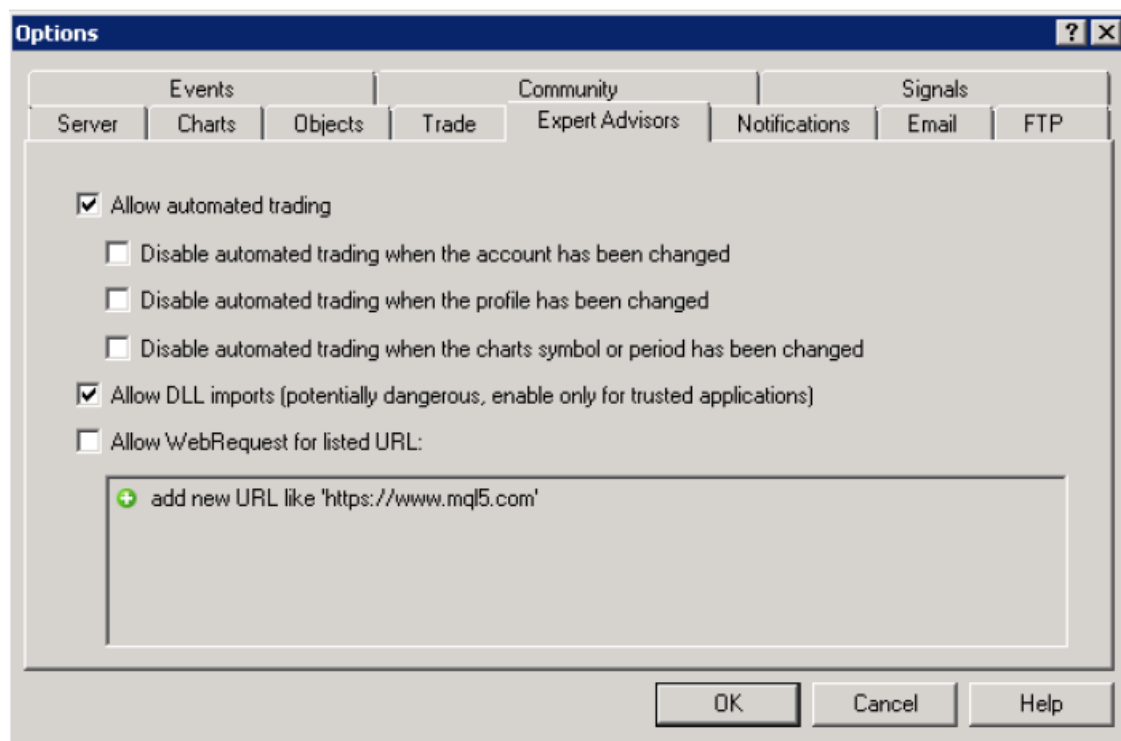

For lot size location, you'll plug that in, in the next steps that we describe.

---

## Expert Advisor installation

1. Install Meta Trader 4 platform from your broker – they provide it free (recommendations at earlier part of this guide).

2. You will need to do the following configuration. At the top of MT4, Click Tools>Options>Expert Advisors. Check the same boxes as indicated below, then click Ok:

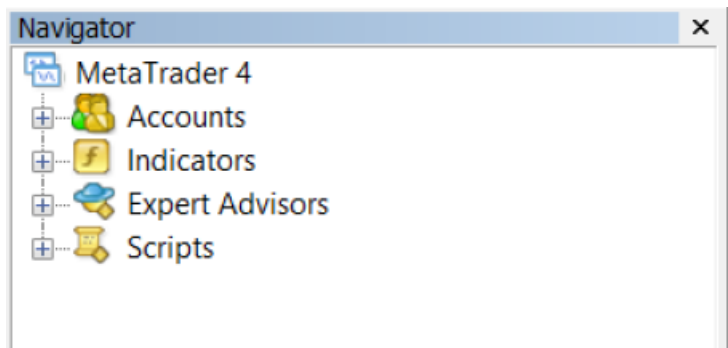

3. On the top of Meta Trader 4 make sure the AutoTrading / Automated Trading is pushed in and GREEN, click it, if it's RED.

4. To install **Trade Explorer** you will need to load the **Trade ExplorerFalcon.ex4** file into the platform's data folder: At the top left of the platform click File>Open Data Folder>MQL4>Experts> and place the **Trade ExplorerFalcon.ex4** file there, next close the folder. **Now restart the MT4 platform (close it and open it again).**

5. You should see Navigator window in your Meta Trader 4 platform on the middle left with **Trade Explorer Falcon** in it (if you don't see it please click the + sign next to Expert Advisors):

6. Now we need to open the window within Meta Trader 4 for the currency pairs that **Trade Explorer Falcon** will be trading on. To do this click the **File** button at the top left, then click on **New Chart**, then you will look for the following currency pairs and click them to open OR right click on the PAIRS in Market Watch (box on the left top) and click Chart Window. If any pairs are missing, simply right click and click SHOW ALL in the box.

Here are the list of pairs to use:

AUDCAD  
AUDNZD  
AUDUSD  
EURAUD  
EURCAD  
EURGBP  
EURJPY  
EURNZD  
EURUSD  
GBPJPY  
GBPUSD  
NZDCAD  
NZDUSD  
USDCAD  
USDCHF  
USDJPY

If you have a smaller account (less than \$3k), or just prefer less risk exposure for your account, then you can use less pairs such as:

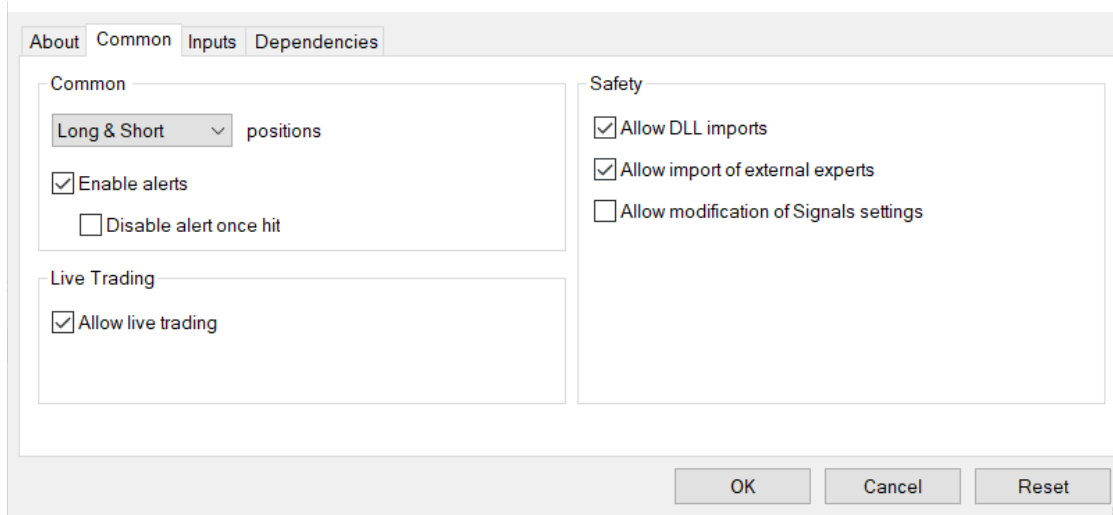

**EURUSD, GBPUSD, USDCAD, USDCHF, USDJPY, EURGBP**

For each currency pair chart as you open them - click on **"M5"** button towards the top of the screen to adjust the timeframe of that chart. This means each candlestick bar on the chart represents 5 minutes. You can also go back to each one and click M5 by clicking on the tabs with the pair name towards the bottom of the platform (note it can work on M1 and M15, but not recommended unless you have experience testing).

7. Now click **Trade Explorer Falcon** from the Navigator window on the left, and drag it onto each currency pair or you can right click the **Trade Explorer Falcon** name and choose "Attach to a chart" – it will attach to whichever chart you have in focus. You'll need to click the pairs tab at the bottom for each one, then repeat this step over and over, and each pair should be on M5 as well from step 6.

8. Once you attach **Trade Explorer Falcon** to a chart window, a box will appear like the following below. Click **Common** then make sure the check marks match the following (then click **Inputs**):

9. Under inputs section, enter your **receipt / transaction reference** associated with your purchase in the respective input. To increase or adjust lot size, simply change FixLot setting (mentioned in risk section on previous pages).

**Once done, click OK in the window, NOT SAVE. Then repeat these steps for each other pair you want to attach Trade Explorer Falcon to.**

Expert - Trade Explorer Falcon

About Common Inputs Dependencies

Variable	Value
Receipt	Enter Your Receipt Here
FixLot	0.01

Load

Save

OK Cancel Reset

10. If everything is OK and loaded properly you will see the text **Trade Explorer Falcon** with a smiley emoticon on the top right of each chart.

***11. That's it. Configuration is finished! Let it run on its own 24/7 and do NOT touch it. A VPS is HIGHLY Recommended.***
